The skin around the eyes, neck and décolleté are the areas where the first sign of aging appear. The skin in these areas is also thinner, more delicate and often very dry, which is why Inter Beauty has developed a special firming and moisturising treatment especially for these areas. The treatment is recommended for people aged 20 and upwards because of its preventing and reactivating capabilities. This special treatment is part of a luxury facial treatment incorporating a full and exciting evening makeup.
